Graphic Design  
Presentation Design  
Medical Illustration  
Patient Education  
Graphic Medicine  
Data Visualization  
UI/UX

- User-Centered Design
- Information Architecture
- Wire-framing
- Prototyping
- User Research

Motion Animation  
2D Animation  
Video Editing  
3D Modeling

## SOFTWARE

Adobe Illustrator  
Adobe Photoshop  
Adobe After Effects  
Adobe InDesign  
Maya  
Blender  
ZBrush  
C4D  
3D Slicer & Horos  
Microsoft Office Suite  
Visual Studio Code  
Basic HTML/CSS  
Figma  
Miro

## PROFESSIONAL SUMMARY

Medical illustrator with 3+ years of experience in science and health communication, and visual design. Holds an **MSc in Biomedical Communications**. Proficient in **creating patient-facing visuals, infographic, animation and UI/UX designs** that translate complex scientific information into clear visuals. **AMI Social Impact Award** recipient in 2025 for **commitment to inclusive visual communication**.

## RELEVANT WORK EXPERIENCE

**Science Designer**, Contractor, infograph-ed  
April 2026 – Present

- Translated complex medical information into clear, visually engaging patient-facing and professional educational materials.
- Managed end-to-end workflows through iterative revisions and interdisciplinary collaboration.

**Biomedical Communicator and Graphic Designer**,  
Clay Visuals (self employment)  
November 2025 – Present

- Led the development of visual concepts, ensuring alignment with project goals. Clients include researchers, physicians, health professionals, and the general public.
- Recent collaborations include the design of an accessibility website to reduce barriers in healthcare for patients and physicians (in development with an interdisciplinary team).

**Scientific Illustrator**, Contractor, Ingenium – Ocean and Fisheries Canada (DFO)  
2024 – 2025

- Produced scientifically accurate species illustrations for a conservation exhibit, translating anatomical research into visually engaging, accessible educational content.

# EDUCATION

**MSc, Biomedical Communications,**  
University of Toronto, Institute of Medical Science  
August 2023 – July 2025

**Continued Education,** Interamerican University of  
Puerto Rico  
2018 – 2019

**BA, Psychology and Mental Health, *Cum Laude*,**  
University of Puerto Rico, Department of Social  
Sciences  
August 2014 – May 2019

# RESEARCH HIGHLIGHTS

**MRP, Tono: Visualizing eczema in every skintone,**  
University of Toronto, Toronto, Ontario  
2024-2025

- Designed and developed TONO, a digital atlas that visualizes eczema across diverse skin tones to improve diagnostic confidence and support equitable care among primary care practitioners.

**Frontiers in Alzheimer's and Aging Research**  
Morehouse School of Medicine, Atlanta, Georgia  
2023 – 2025

- Conducted hands-on laboratory research using *C. elegans* and sea urchins in intensive workshops and seminars.

**Developing Future Biologists,** University of Michigan,  
Medical School, Ann Arbor, Michigan  
2019

- Completed laboratory courses using zebrafish, *C. elegans*, chick/mouse embryos, and *D. melanogaster*.

**Research Assistant,** University of Puerto Rico,  
Ponce, PR  
2018 – 2019

- Extracted and cleaned qualitative interview data; organized datasets using IBM SPSS.

**Research Assistant,** University of Puerto Rico,  
Ponce, PR  
2014 – 2019

- Recruited and screened research participants; conducted structured interviews and documented qualitative data.
